

## Bio

Jason R. W. Merrick is a professor in the Department of Supply Chain Management and Analytics and in the Department of Statistical Sciences and Operations Research at Virginia Commonwealth University. He has an M.A. in mathematics and computation from Oxford University and a D.Sc. in operations research from the George Washington University. He teaches courses in decision analysis, risk analysis, and simulation. His research is primarily in the area of Bayesian statistics, decision analysis, and simulation. He has worked on projects ranging from assessing maritime oil transportation risk, adversarial modeling for counter-terrorism, the environmental health of watersheds, and optimal replacement policies for rail tracks and machine tools. He has received grants from the National Science Foundation, the Department of Homeland Security, the Federal Aviation Administration, the United States Coast Guard, the American Bureau of Shipping, British Petroleum, and Booz Allen Hamilton, among others. He has also performed training for Infineon Technologies, Wyeth Pharmaceuticals, Capital One Services, and Deloitte Consulting. He is an associate editor for Decision Analysis, IIE Transactions, and the Euro Journal on Decision Processes.
